COURSE INFORMATION

All course materials and readings will be provided via D2L.

Please be prepared to be outside in all types of weather. Closed toe shoes will be required.

Course Description

Application of animal handling and management techniques for dairy, beef, sheep, swine and poultry.

Student Learning Outcomes

- 1.. Apply principles and concepts from various disciplines (nutrition, genetics, reproduction, health, handling etc.) in making livestock management decisions.
2. Understand the different options available to livestock producers for routine management practices and evaluate the pros and cons of a management technique or decision.
3. Gain the ability and experience to perform common management practices in different farm livestock species which may include the following: vaccinations, deworming, implanting, piglet processing, animal identification, pregnancy diagnosis among others.

The syllabus/schedule are subject to change.

COURSE REQUIREMENTS

Student Responsibilities or Tips for Success in the Course

Material will be taught primarily through experiential learning. Therefore, your attendance and active participation is vital to success. Please feel free to meet with me if you have any concerns about your participation in the course. It is required to have closed toe shoes for the course and clothes that may get dirty. Be aware of the weather and be prepared. Class activities may vary or change due to opportunities that arise on the farm. Points will be awarded based on participation and completion of tasks throughout the semester. The midterm will be based on completion of a project and presentation. The final will be cumulative at the end of the semester.

Instructional Methods

Attendance and Assignments

Many of the assignments and activities will be completed in the allotted meeting time for the course. Should there be outside of class assignments turned in late, they will be graded at 50%. If you will be absent for a class, please inform me via email.

Material Covered

The course will primarily cover three disciplines within animal science: nutrition, reproduction, and health. Within each discipline we will discuss varying species and utilize hands-on opportunities to connect foundational knowledge to common practices in livestock production. These may include: vaccinations, palpation, feed identification, parasite detection and management, grazing strategy, and animal handling among others.

Grading

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

The percentage grade will be based on number of points earned out of 600 total points. The final exam will be worth 100 points and the midterm project will be worth 100 points. Remaining points will be based on attendance, participation, and completion of activities.

The syllabus/schedule are subject to change.
