**Text book: None required. Use any text book of your choice for reference or look up information on internet.**

### **Course Description**

The goal of this course is to study modern technologies that are used to construct big-data computing systems and methods and tools for big-data analytics. The course is designed to be student-driven and interactive. It would be based on student presentations of selected research papers on big data coupled with instructor-led lectures. There would be hands-on practice by installing and configuring software used for big-data computing and analytics, especially Apache Spark framework with Python programming language. Students will learn to create programs running over a distributed setting.

## **Student Learning Outcomes**

1. to understand big data computing paradigms
2. to understand big data storage issues
3. to understand big data analytic issues
4. to review recent trends in big data research
5. to be familiar with Apache Spark framework and Python programming language
6. to identify big data problems and develop analytic solution on Apache Spark framework

## **COURSE REQUIREMENTS**

### **Minimal Technical Skills Needed**

Students should be able to study independently and have strong implementation skills. Students should be also familiar with basic Linux shell commands and system skills. Students are expected to have strong background in both mathematics and computer systems.

### **Instructional Methods**

The instructor and students will meet every week face-to-face or online to discuss topics. Students are supposed to download assignments online and submit them on time. Students are encouraged to utilize discussion boards for Q&A or to attend the live Q&A session to get in-person help from the instructor or colleagues.

### **Student Responsibilities or Tips for Success in the Course**

Assignments will be announced on myLeoOnline. It is students' responsibility to keep up with the schedule.

## **GRADING**

Final grades in this course will be based on the following scale:

- A = 90%-100%
- B = 80%-89%
- C = 70%-79%
- D = 60%-69%
- F = 59% or Below

### **Assessments**

Basis for Evaluation:

Assignments/Presentations/Participation in Class and D2L 100%

## **AI use policy [Draft 2, May 25, 2023]**

**East Texas A&M University acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.**

**Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).**

**Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.**

**In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.**
