Most materials, work, and readings will be assigned using freely available online textbooks and resources. We will be using the following as textbooks for the course:

- Deep Learning with Python by Francois Challet at <https://www.manning.com/books/deep-learning-with-python>
- Neural Networks and Deep Learning by Michael Nielson at <http://neuralnetworksanddeeplearning.com>

## Course Description

In this course, the theory and practice of neural computation for machine learning are introduced. Artificial neural networks are utilized for various real-world applications, including classification, time-series prediction, regression, and pattern recognition. The class starts with an introduction to feed-forward neural networks. More complicated, multi-layered "deep" networks are then covered. Basic backpropagation, gradient descent, and modern regularization techniques are implemented in assignments. The class will examine modern deep learning techniques, including convolutional neural networks, deep belief networks, and deep recurrent neural models such as LSTM networks. Readings and current results from the literature on neural network research will be discussed. Prerequisites: CSCI 574.

## Student Learning Outcomes (Should be measurable; observable; use action verbs)

1. Understand intuitively the mathematical and geometrical basis of how NN work and learn.
2. Be able to use multi-layer feed-forward networks for classification and regression machine learning problems.
3. Be introduced to so-called deep learning neural networks and their applications.
4. Look at some of the uses and advantages of recurrent neural networks.
5. Be familiar with other types of NN architectures and their uses.

Learning outcomes will be measured through mapping assignments and test questions to specific outcome items, as well as through exit surveys of student experiences with the outcome familiarity.

**\*Note: All background material will be developed and offered in efficient and effective ways within the course itself and from scratch.**

## **COURSE REQUIREMENTS**

### **Minimal Technical Skills Needed**

Students should be proficient in a high-level programming language, like C++, Python, or Java.

### **Tips for Success in the Course**

- 1) Be here as often as possible.
- 2) Read assignments and be ready for what we'll be talking about in class.
- 3) Ask if you don't understand something.
- 4) Get help (sooner rather than later) if you have problems:
  - dept lab tutors in Jour 200 or 101-102
  - The Academic Success Center also provides tutoring in the library for a wide variety of subjects
  - make friends with at least one person in class so you can compare notes or check for anything you might have missed
  - get a study group together
- 5) Stay caught up as much as possible.
- 6) Get started on programs so that you have time to get help if you find you need some help.
- 7) Do your own work. Consult with others about problem-solving strategies, but code it yourself.
- 8) What you get out of any class depends to a very large degree on what you're willing to put into it. Get in the habit of writing little practice programs to try out new language features as we learn them. As you write more programs (even small ones), the process becomes easier, you're much more likely to remember how the language works, and you get much better at programming logic (the hardest part of computer programming).
- 9) Know your own limits and don't over-extend yourself any more than necessary.

### **Instructional Methods**

This course is a lecture supplemented by text and D2L. To get started with the course, go to: <https://leo.tamuc.edu>. You will need your CWID and password to access the course.

1. Make-up examinations for exams will not be given. If you have a compelling and documented reason for not being able to attend the exam, you must make alternative arrangements before the examination. Grades will not be curved for the

course, and you will receive the grade that you earn through your performance on the assignments, exams, project, and bonus questions. There will be no individual exceptions to the grading policy, and, therefore, grades of a C or F are possible.

2. No late work will be accepted except under special extenuating circumstances when prior arrangements have been made with the instructor.
3. Grades will be posted within one week after assignment due date.
4. You are responsible to check your grades after each assignment. Please report any errors or inconsistencies to the instructor within 7 days if possible.
5. All assignments must be submitted using [D2L](#) if applicable. Students must adhere to the following rules when submitting assignments. Failure to do so will affect their grades.

- File Name

Should be named according to the following pattern: LastFirstX.\*\*, where Last is the student's last name, First is the student's first name, and X is the assignment number.

- For example, student John White would submit either WhiteJohn3.py or WhiteJohn3.ipynb for Programming Assignment 3.

- File Header

- The first lines of the submitted file should include a comment with the following information and format:

```
# A short description of the program.  
#  
# @author Last Name, First Name  
# @assignment CSCI 560 Assignment X  
# @date Date  
#
```

6. All students are requested to access their university e-mail account regularly. You may be contacted when important matters arise. If you have any questions about the course or need assistance, please contact the instructor and/or the TA in person during office hours or by e-mail at any time.

## GRADING

Letter grades for the course will be assigned according to the percentage scale provided below.

A	90% -100%
B	80% - 89%
C	70% - 79%
D	60% - 69%
F	59% or Below

## Assessments

End-of-semester numeric scores will be weighted as follows.

- Assignment/Lab 45%
- Quiz and Participation 15%
- Midterm Exam 20%
- Final Exam 20%

**\*Note: There will be a number of quizzes that will cover lecture material, and quizzes are unannounced pop-up quizzes. Each week, there would be an assignment and a quiz. They are to be solved independently and are tightly related to the class materials. Neither late assignments nor makeup quizzes are allowed.**

### Notes:

#### A. Assignments/Labs:

Each week, there would be an assignment and/or lab that should be solved independently and tightly related to the class materials and topics. Submissions are always expected to be finished in good shape by deadlines. All assignments must be formally submitted to the assignment folder. Email or any other formats of submission do not count and will not be graded. If you experience temporary difficulty accessing D2L, you can email me your assignment as proof of on-time submission. However, you still need to upload it to the assignment folder as soon as the issue is resolved to receive credit.

Neither late assignments nor labs would be allowed without the instructor's permission. The instructor should be notified in advance with adequate, verifiable documentation (e.g., medical letters or police reports). For the documentation, it will depend on the type of problems that you have experienced. The department and instructor reserve the right to check on the validity of the documents you submit and reject your requests/claims due to the lack of evidence. Without any valid documentary evidence, a 10% per day late penalty would be applied to submissions, including assignments and labs. Submissions will NOT be accepted or even considered more than 4 days after the due date. If it is the case, a grade of zero will be awarded to the submission or missed work.

*The syllabus/schedule are subject to change.*

**The Counseling Center at A&M-Commerce, located in the Halladay Building, Room 203, offers counseling services, educational programming, and connection to community resources for students. For more information regarding Counseling Center events and confidential services, please visit [www.tamuc.edu/counsel](http://www.tamuc.edu/counsel)**

#### B. Attendance

For the face-to-face course, students are required to attend both lectures and labs for cooperative learning, active engagement, and effective communication. Attendance will be evaluated based on class participation, while lab participation will be factored into the lab grade.

For the online course, students should make an effort to attend the live lecture if possible or listen to the recorded lecture. Students are required to keep up with class materials and announcements made during live lectures or via emails, including changes to due dates or assignments. Attendance will be evaluated based on the submission of assignments and labs.

#### C. Quizzes and Exams

You should do your own work on exams, assignments, and labs. Copying another student's work is not acceptable. Any indication of cheating or plagiarism on an exam/assignment will result in an automatic score of 0 (zero) for all students involved. However, based on cheating and plagiarism activity in any section of the class, the instructor reserves the right to assign an F grade to the identified student(s). Regarding codes in assignments, you may be required to explain the code you submitted. In the case of a discursive explanation, the instructor holds the right to lower your grade.

Quizzes and exams are graded based on the correctness of the answers. Quizzes are unannounced pop-up quizzes. The time of each quiz will be announced at the beginning of the class. There will be no make-up for any missed in-class quizzes. All exams are comprehensive. The time and location of each exam will be announced one week before the exam. All students are expected to be present for exams. The instructor should be notified in advance if students will be absent, accompanied by adequate, verifiable documentation (e.g., medical letters or police reports). Failure to do so may result in the student receiving a score of zero for the missed exam.

#### D. Bonus credit

*The syllabus/schedule are subject to change.*

The Counseling Center at A&M-Commerce, located in the Halladay Building, Room 203, offers counseling services, educational programming, and connection to community resources for students. Students have 24/7 access to the Counseling Center's crisis assessment services by calling 903-886-5145. For more information regarding Counseling Center events and confidential services, please visit [www.tamuc.edu/counsel](http://www.tamuc.edu/counsel)

According to the quality, completion, and/or creativity of assignments, labs, and exams, students may be awarded bonus credit in some cases.

### **Additional notes:**

You must earn an A on your own. Assume that you have completed all assignments, lower borderline grades may be affected positively or negatively by factors such as:

- the class grade distribution
- your class attendance, participation, and behavior (including what should be common courtesies: no sound-producing device use in class, arrive on time, stay until class is over, avoid distracting other students)

You need to provide me with a reason to believe you deserve a grade higher than your percentage indicates and that you've made every effort to help yourself (you're attending class, are at least attempting programs, and participating in the current events discussions).

A D2L portal will be used for sharing information and resources. The D2L portal will be used for sharing information and resources. Assignments will be uploaded to the D2L course shell. Students are responsible for obtaining and setting up their D2L account using their TAMUC student login. They need to follow the D2L course shell daily to access course announcements, download and upload assignments, and participate in other course activities.

## **Artificial Intelligence Software, Misuse, and Writing Detention**

### **Artificial Intelligence, Chatbots, or other Software**

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, Chatbots, or other software that have the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

*The syllabus/schedule are subject to change.*

The Counseling Center at A&M-Commerce, located in the Halladay Building, Room 203, offers counseling services, educational programming, and connection to community resources for students. Students have 24/7 access to the Counseling Center's crisis assessment services by calling 903-886-5145. For more information regarding Counseling Center events and confidential services, please visit [www.tamuc.edu/counsel](http://www.tamuc.edu/counsel)

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.

### **AI Misuse and AI Writing Detection in this course**

Academic integrity is a fundamental aspect of our learning. There might be AI misuse in this course, particularly plagiarism and unethical behavior. As your instructor, I would like to remind you of the serious consequences of such activities. AI should be used wisely to help produce authentic and original work and promote productivity and creativity. No one wants to witness the misuse of AI.

To address this problem, Turnitin's AI writing detection

(<https://www.turnitin.com/products/features/ai-writing-detection>) is enabled automatically in the D2L to detect and prevent plagiarism. It employs sophisticated algorithms to compare written material to a large database of sources to find similarities or copied content. It is critical to understand that these tools are not intended to invade your privacy or undermine your creativity, but rather to ensure that you are producing unique and real content.

University's academic integrity policy is available at <https://www.tamuc.edu/college-of-business/integrity-policy/>. It is our shared responsibility to encourage a culture of academic integrity and prevent AI abuse.

### **Academic Plagiarism and Avoid Academic Plagiarism in Writing**

There are numerous resources available relating to academic plagiarism. Please check them all to build a better understanding of academic plagiarism and avoid academic plagiarism in writing.

## TECHNOLOGY REQUIREMENTS

### Browser support

D2L is committed to performing key application testing when new browser versions are released. New and updated functionality is also tested against the latest version of supported browsers. However, due to the frequency of some browser releases, D2L cannot guarantee that each browser version will perform as expected. If you encounter any issues with any of the browser versions listed in the tables below, contact D2L Support, who will determine the best course of action for resolution. Reported issues are prioritized by supported browsers and then maintenance browsers.

Supported browsers are the latest or most recent browser versions that are tested against new versions of D2L products. Customers can report problems and receive support for issues. For an optimal experience, D2L recommends using supported browsers with D2L products.

Maintenance browsers are older browser versions that are not tested extensively against new versions of D2L products. Customers can still report problems and receive support for critical issues; however, D2L does not guarantee all issues will be addressed. A maintenance browser becomes officially unsupported after one year.

Note the following:

## **System Maintenance**

D2L runs monthly updates during the last week of the month, usually on Wednesday. The system should remain up during this time unless otherwise specified in an announcement. You may experience minimal impacts to performance and/or look and feel of the environment.

## **Interaction with Instructor Statement**

Interaction with Instructor Statement: For general questions and assistance with the course, the instructor will keep a schedule of 6 regular office hours per week. If a student cannot meet during the designated schedule, arrangements can be made to meet at a more convenient time. An email should be sent to the instructor at least 24 hours prior to the time the student plans on meeting. Generally, I will reply to your e-mail messages in a timely manner. A reply can be expected within 24 hours.

My responsibilities:

1. Make sure to accommodate all your learning needs
2. Try my best to answer your questions and resolve other related issues
3. Give feedback and your grade on assignments within one week of the due date.

## **COURSE AND UNIVERSITY PROCEDURES/POLICIES**

### **Course Specific Procedures/Policies**

Class Decorum Civility in the classroom or online course and respect for the opinions of other is very important in an academic environment. It is likely you may not agree with everything that is said or discussed in the classroom/online course. Courteous behavior and responses are expected. To create and preserve a learning environment that optimizes teaching and learning, all participants share a responsibility in creating a civil and non-disruptive forum. Students are expected to conduct themselves at all times in a manner that does not disrupt teaching or learning. Faculty have the authority to request students who exhibit inappropriate behavior to leave the class/online course and may refer serious offenses to the University Police Department and/or the Dean of Students for disciplinary action. (See Student Guidebook)

### **Academic Honesty**

It is the policy of the University, the History Department, and the instructor that no form of plagiarism or cheating will be tolerated. Plagiarism is defined as the deliberate use of another's work and claiming it as one's own. This means ideas as well as text, whether paraphrased or presented verbatim (word-for-word). Cheating is defined as obtaining unauthorized assistance on any assignment. Collusion is defined as selling or purchasing academic products with the intention that they be submitted to fulfill an academic or course

requirement. Proper citation of sources must always be utilized thoroughly and accurately. Cheating/plagiarism/collusion will result in a grade of "0" for the assignment, and may also result in failure of the course and/or disciplinary action by the University. Any student found guilty of violating academic integrity policy will fail the assignment in question, will automatically fail the course and will be subject to disciplinary action by the university (see Texas A&M University-Commerce Code of Student Conduct 5.b. [1,2,3]). Further information on the history department's plagiarism policy can be found on the department webpage. If you are unclear about what constitutes academic dishonesty, ask.

## **Writing Center**

Students are encouraged to take advantage of the Writing Center's resources for assistance with drafting their written assignments. Although the center will not write your paper for you, it may help you to improve your writing skills. If you use the Writing Center, plan in advance because it can only help you if there is adequate time to incorporate their suggestions into your paper. Additionally, I am willing to read rough drafts (and even multiple drafts) of your written work so long as the drafts are submitted at least one week prior to the due date.

## **Syllabus Change Policy**

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance.

## **University Specific Procedures**

### **Student Conduct**

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The Code of Student Conduct is described in detail in the [Student Guidebook](#).

<http://www.tamuc.edu/Admissions/oneStopShop/undergraduateAdmissions/studentGuidebook.aspx>

Students should also consult the Rules of Netiquette for more information regarding how to interact with students in an online forum: [Netiquette](#)
