### **Course Description**

The purpose of this class is to train you to conduct psychological research and produce a thesis. This includes all aspects of the research process: development of research materials and/or experimental procedures, how to conduct studies/experiments, data analysis and interpretation, and empirical writing. The class is conducted through informal meetings with Dr. Reysen. The goal of the class is to successfully propose, conduct, and defend your thesis project.

Beyond meeting to discuss research, you may be asked to conduct library research (google scholar is going to be your best friend), conduct research (e.g., run participants), track and maintain studies using the SONA system (participant sign-up system), enter data into the computer, organize and manage databases, and various other tasks.

### **COURSE REQUIREMENTS**

The student will produce and defend a thesis project. If the student does not complete and defend the thesis during the semester, the instructor will assign a grade of "I" and the student will defend the dissertation in a subsequent semester.

### **Course Specific Procedures/Policies**

My expectations in this area should be very simple to fulfill. (1) Immaturity will NOT be tolerated! If a student's behavior is disrupting the class, he/she will be asked to stop. (2) Respect: Given the nature of this course, we may discuss issues that some of you may find embarrassing, uncomfortable, and/or even "inappropriate." To remain in this class, you must be respectful of others and maintain a mature and professional manner at all times. Failure to do so will result in your expulsion from the course. (3) The Student's Guidebook addresses the issues of academic cheating and plagiarism. These are a breach of conduct, and students are subject to disciplinary actions. It's simple. Do NOT cheat (to cheat is to act dishonestly or unfairly in order to gain an advantage) or plagiarize (to plagiarize is to take the work or idea of someone else and pass it off as one's own)!
