COURSE DESCRIPTION

Students will apply life design methodology to research, discover, and activate their purpose through intentional career exploration. Through creative inquiry, students will investigate effective career development approaches while leveraging AI tools to be collaborative partners in their process. Students will research career fields, prototype professional experiences through a micro-internship, and develop a digital portfolio using Adobe Creative Cloud to tell their story. This course emphasizes hands-on experimentation, purposeful reflection, and the development of action-oriented career launching strategies.

STUDENT LEARNING OUTCOMES

Completion of this course provides the student with the knowledge to:

1. Apply the life design process (acceptance, inquiry, ideate, prototype, test) to conduct original research into career pathways aligned with personal purpose and strengths.
2. Design and implement a career prototypes through a micro-internship, informational interviews, and skill-building projects, documenting insights gained through structured reflections.
3. Develop a comprehensive understanding of industry requirements and opportunities through research-based investigation and professional engagement.
4. Synthesize research findings and prototype experiences into an actionable career launch plan with specific, measurable steps for implementation.
5. Create a professional digital portfolio using Adobe Creative Cloud that effectively communicates personal purpose, professional experiences, and career-ready competencies.

The syllabus/schedule are subject to change.

COURSE REQUIREMENTS

Minimal Technical Skills Needed: Students will need reliable computer and internet access for this course. Students must be able to effectively use myLeo email, myLeo Online D2L, and Microsoft Office.

Instructional Methods: This course is an online course. To be successful in this course, all content and course modules should be read and reviewed. All assignments and quizzes (both graded and not graded) must be completed. Please contact the instructor by email for any assistance.

Student Responsibilities or Tips for Success in the Course: To be successful in this course, all content and course modules should be read and reviewed. All assignments and quizzes (both graded and not graded) should be completed. Please contact the instructor by email for any assistance.

ASSESSMENT

- Module Assignments & Discussions (50%)
- Micro-Internship Experience (25%)
- Final Portfolio (25%)

Participation: Your active, informed participation is essential for doing well in this course and designing your life. There will be opportunities to engage with your peers and with your instructor. Please take advantage of all your resources and opportunities as they represent themselves.

Module Assignments & Discussions (50%)

You will complete give reflective exercises that help guide you through the life design process. These activities focus on self-assessment using the Love-Play-Work-Health Dashboard, values exploration through True North exercises, skills identification via career assessments, and leadership development through "Start with Why" reflection as well as practicing the digital skills needed to assemble the final portfolio. Each activity builds upon previous learning and requires you to connect personal insights to career planning and professional development.

Micro-Internship Experience (25%)

Using design thinking methodology, students identify a problem in their field of interest and complete a 24-hour professional project that addresses this challenge. The experience includes developing a detailed proposal with learning outcomes tied to NACE competencies, executing the project with a site supervisor, and receiving professional evaluation. This real-world application allows students to prototype career experiences and develop job-ready skills. Students also have the option to pursue related micro-credentials as part of their internship requirement.

Final Professional Portfolio Website (35%)

Students create a comprehensive online portfolio that strategically showcases their skills, experiences, and readiness to contribute to their chosen field. The website must demonstrate skills integration, technological awareness, micro-internship outcomes, a professional mission statement, and include a written reflection on design choices. This capstone project serves as a professional tool for career launch and demonstrates mastery of program learning outcomes.
