

PHYS 1401.01E, College Physics I

COURSE SYLLABUS: Spring 2026

INSTRUCTOR INFORMATION

Instructor: Dr. Blake Head

Office Location: STC 340

Office Hours: TBA

Class Time: MWF, 10:00am - 11:50pm: STC 135

University Email Address: thomas.head@etamu.edu

Preferred Form of Communication: Office Hours or E-mail! Or just chat with me after class.

Communication Response Time: I will do my best to respond to your e-mails as soon as possible, definitely within 24 hours.

Learning Assistants: Nicholas Cox

Graduate Assistant: TBA

COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings

A free textbook: W. Moebs, S.J. Ling, and J. Sanny, *University Physics Volume 1*, Open Stax, Available freely online at <https://openstax.org/details/books/university-physics-volume-1>

A free nontraditional textbook: S.A. Hill, *How Things Move, Why Things Move*, Available freely online at <http://howwhy.sahill.us/>

In lieu of a course packet or lab manual, all class activities are digital and can be found in D2L or linked in D2L. Many activities are in the form of Google Docs. You should be able to work off of a laptop/tablet/etc. during class (class laptops are available).

However, sometimes the internet in our classroom is not great, so you might want to download or print activities before class.

The syllabus/schedule are subject to change.

Course Description

This is a calculus-based introductory physics course in mechanics. Topics include momentum, dynamics, energy, and kinematics.

University Catalog Description

Calculus based physics course in mechanics for science, mathematics and engineering students. Prerequisites: You must be currently enrolled in Calculus I or have previously taken Calculus I.

Student Learning Outcomes

1. Students will be able use momentum to describe a physical situation and calculate the motion of an object using these quantities.
2. Students will be able to represent the forces on an object in a physical situation and calculate the resulting motion using Newton's Laws.
3. Students will be able use energy to describe a physical situation and calculate the motion of an object using these quantities.
4. Students will be able to precisely explain and calculate motion using the concepts of position, velocity, and acceleration

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Students should be able to use D2L (myLeo Online), view videos on YouTube, use a calculator, use Excel and/or a graphing calculator or app, convert work to a pdf, take screenshots, use a variety of online communication methods such as Zoom, Discord, D2L, and email.

Instructional Methods

This course is taught in '*studio mode*'. Studio mode is a student centered active learning environment that concentrates on group work. When learning how to do something, there is no better teacher than experience and practice. In order to learn physics, you will be actively doing physics every day.

Activities will be completed in groups of 3-4, assigned by the instructor. These groups will change 2-3 times throughout the semester. During class, you and your group will work through labs, conceptual work, and solve problems together. Meanwhile, the instructor, learning assistants, and graduate assistant will visit each table to listen in on your discussion, observe your problem solving process, ask / answer questions, and generally poke at you to gauge what things make sense and what things don't. Our goal is to make it so you are able to ask the right kind of questions that allow you to solve problems yourself. Our goal is NOT to give you the answers.

Research in physics education has shown that students learn best when they are actively engaged in class. Studio mode has been implemented at many universities

The syllabus/schedule are subject to change.

and has been found to have positive impacts on conceptual understanding and problem-solving ability.

Student Responsibilities or Tips for Success in the Course

The vast majority of class time will be spent working in groups. Students are expected to participate fully in group-work in their assigned roles. Students are expected to have completed any assigned reading / watch assigned videos by the due date. Students are expected to take notes on all problems you solve in class, any notes shared by other groups on whiteboards. For work displayed on whiteboards, the easiest thing to do is to just take photos of the work using camera phones. All students are expected to complete the tutorial worksheets.

GRADING

Assignments will be scored in points. In addition, you will see associated learning outcomes on each homework assignment. These are there to inform you what ideas, concepts, and goals you will be assessed on. They also serve as a place for you to clearly see what things we are expecting you to do!

Your grade will be entirely be determined by **Formative Assessments**, **Group Assignments**, and **Homework Assignments**. The weights of each assignment type are given below:

Formative Assessments -	60%
Group Assignments -	10%
Homework Assignments -	30%

Total -	100%
----------------	-------------

Myself or the GAT will provide feedback on each of your assignments. Using this feedback, you will have the opportunity to revise your work and resubmit within one week of receiving a grade. Remember, college is about **learning**, so as long as you are making the effort to learn, that is what is most important!

A brief description of each assignment type is given below.

Formative Assessments

These assignments will occur roughly once per week and will consist of 3-4 physics problems over the relevant section. These are to be completed individually in class. Students may bring handwritten notes. Once graded, you may address any feedback you've received on these assignments, and re-submit to earn any missed points. Revisions must be checked in person by an LA, GA, or the professor.

The syllabus/schedule are subject to change.

On each *Formative Assessment*, you will receive 1 of 3 marks:

Label	What it means
Accepted	This work is completed for the most part correctly. Any errors are fairly minor. You are done!
Revise	You have attempted the work, but there are some things you need to work on learning better. You should revise your assignment.
No credit	You either submitted nothing, accidentally submitted the wrong assignment, or submitted work that is barely started.

You should expect most of your assignments first attempts to be marked Revise.

This is not a bad thing and you should not feel discouraged! In a real job (even mine!) things nearly always need to be revised once or twice. My goal is to have you learn this stuff, so I will hold you to a high standard to support that learning process.

If your work comes back Revise, that means you have one week to revise it if you choose. You have *unlimited* revision attempts, but you always need to complete your next revision within 1 week of when I last sent you feedback. Any submissions after this week will not be accepted and your grade will be locked in.

- You must complete your revisions individually because these are how I see how much you can do on your own.
- You must include in your revision what you went back and changed / fixed, and provide some explanation of why it is important.
- The revised portion should be *visually distinct* from your original submission so I know what to look at
- You must have revisions checked in person by someone.

You **MUST** turn your work in on time. I don't accept late work outside of extenuating circumstances! It is okay, however, if your first attempt simply says something like, "I think this has something to do with X, but I feel really lost." That will allow you to submit revisions. There must be evidence that you made a legitimate attempt!

Group Assignments

During class, students will work on a variety of assignments together in groups. When completed, these assignments must be uploaded to the course shell under the relevant heading. Group members may all upload the same image of their group work, but each student must make their own submission. These are primarily graded on completion as it is expected that you will make lots of mistakes here.

The syllabus/schedule are subject to change.

Homework Assignments

Occasional homework assignments will be assigned for students to complete outside of class. Just like *Formative Assessments*, you may also revise these assignments based on any feedback you receive. The same one-week grace period applies here as well.

Attendance Policy

This course is a studio-mode active learning classroom. This requires that students are present and actively participating in **all** lessons. If students fail to show up, then we create a situation where no group work can happen, defeating the entire purpose of the class. For this reason, this course has a strict attendance policy.

Students have a maximum of 3 unexcused absences. After this, each additional unexcused absence will result in your maximum possible grade in this course being reduced by 5 points (one half of a letter grade). We will be taking attendance each day at the start of class. If you are significantly late, it is the student's responsibility to meet with an instructor to be marked present for that day.

If you let someone know you will be missing class beforehand, that absence will be considered excused. Additional proof may be requested if necessary.

COURSE OUTLINE / CALENDAR

Below is a tentative schedule for the material we will be covering this semester. This could change depending on pacing!!

Content schedule

Weeks 1-2	Momentum and impulse
Weeks 3-8	Dynamics
Weeks 9-10	Work and Energy
Weeks 11-13	Kinematics
Weeks 14-15	Rotation
Week 16	Finals week

The syllabus/schedule are subject to change.

TECHNOLOGY REQUIREMENTS

LMS

All course sections offered by East Texas A&M University have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are technical requirements

LMS Requirements:

<https://community.brightspace.com/s/article/Brightspace-Platform-Requirements>

LMS Browser Support:

https://documentation.brightspace.com/EN/brightspace/requirements/all/browser_support.htm

Zoom Video Conferencing Tool

https://inside.tamuc.edu/campuslife/CampusServices/CITESupportCenter/Zoom_Account.aspx?source=universalmenu

ACCESS AND NAVIGATION

You will need your campus-wide ID (CWID) and password to log into the course. If you do not know your CWID or have forgotten your password, contact the Center for IT Excellence (CITE) at 903.468.6000 or helpdesk@etamu.edu.

Note: Personal computer and internet connection problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, Starbucks, a TAMUC campus open computer lab, etc.

COMMUNICATION AND SUPPORT

If you have any questions or are having difficulties with the course material, please contact your Instructor.

Technical Support

If you are having technical difficulty with any part of Brightspace, please contact Brightspace Technical Support at 1-877-325-7778. Other support options can be found here:

<https://community.brightspace.com/support/s/contactsupport>

The syllabus/schedule are subject to change.

STUDENT RESPONSIBILITIES FOR COURSE

CWID and Password

You will need your campus-wide ID (CWID) and password to log into the course. If you do not know your CWID or have forgotten your password, contact the Center for IT Excellence (CITE) at 903.468.6000 or helpdesk@etamu.edu.

Technology-Related Issues

Personal computer and internet connection problems do not excuse the requirement to complete all course work in a timely and satisfactory manner. Each student needs to have a backup method to deal with these inevitable problems. These methods might include the availability of a backup PC at home or work, the temporary use of a computer at a friend's home, the local library, office service companies, Starbucks, a ETAMU campus open computer lab, etc.

TECHNOLOGY REQUIREMENTS AND SUPPORT

Minimal Technical Skills Needed

Students will need reliable computer and internet access for this course. Students must be able to effectively use myLeo email, myLeo Online D2L, and Microsoft Office.

Learning Management System (LMS) – D2L

All course sections offered by East Texas A&M University have a corresponding course shell in the myLeo Online Learning Management System (LMS). Below are the technical requirements:

- View the [Learning Management System Requirements Webpage](#).
- Learn more on the [LMS Browser Support Webpage](#).

Technical Support

If you are having technical difficulty with any part of Brightspace, please contact Brightspace Technical Support at 1-877-325-7778. Other support options can be found on the [Brightspace Support Webpage](#).

COMMUNICATION AND SUPPORT

Interaction with Instructor Statement

If you have any questions or are having difficulties with the course material, please contact your instructor. Correspondence will always be through university email (your “myLeo” mail) and announcements in myLeo online (D2L). You will not RECEIVE email through D2L, so be sure to check your ETAMU email for communication. Students are encouraged to check university email daily.

Include the Following in Emails with Instructor:

- Course name and subject in the subject line
- Salutation (Good afternoon, Dr. Jackson)

The syllabus/schedule are subject to change.

- Proper email etiquette (no “text” emails – use proper grammar and punctuation)
- Student name and CWID after the body of the email (possibly add to student signature on email)

COURSE AND UNIVERSITY PROCEDURES/POLICIES

Syllabus Change Policy

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance.

Student Conduct

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The [Code of Student Conduct](#) is described in detail online in the [Student Guidebook](#).

Students should also consult the [Rules of Netiquette Webpage](#) for more information regarding how to interact with students in an online forum.

ETAMU Attendance

For more information about the attendance policy, please view the [Attendance Webpage](#) and the [Class Attendance Policy](#)

Academic Integrity

Students at East Texas A&M University are expected to maintain high standards of integrity and honesty in all their scholastic work. For more details and the definition of academic dishonesty see the following procedures:

[Undergraduate Academic Dishonesty University Procedure 13.99.99.R0.03](#)

[Undergraduate Student Academic Dishonesty Form](#)

[Graduate Student Academic Dishonesty University Procedure 13.99.99.R0.10](#)

[Graduate Student Academic Dishonesty Form](#)

Use of Artificial Intelligence

East Texas A&M University acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

The syllabus/schedule are subject to change.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources

Students with Disabilities-- ADA Statement

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

Office of Student Disability Resources and Services

East Texas A&M University

Velma K. Waters Library Rm 162

Phone (903) 886-5150 or (903) 886-5835

Fax (903) 468-8148

Email: studentdisabilityservices@etamu.edu

Website: [Office of Student Disability Services](#)

Nondiscrimination Notice

East Texas A&M University will comply in the classroom, and in online courses, with all federal and state laws prohibiting discrimination and related retaliation on the basis of race, color, religion, sex, national origin, disability, age, genetic information, or veteran status. Further, an environment free from discrimination on the basis of sexual orientation, gender identity, or gender expression will be maintained.

Campus Concealed Carry Statement

Texas Senate Bill - 11 (Government Code 411.2031, et al.) authorizes the carrying of a concealed handgun in East Texas A&M University buildings only by persons who have been issued and are in possession of a Texas License to Carry a Handgun. Qualified law enforcement officers or those who are otherwise authorized to carry a concealed handgun in the State of Texas are also permitted to do so. Pursuant to Penal Code (PC) 46.035 and ETAMU Rule 34.06.02.R1, license holders may not carry a concealed handgun in restricted locations.

For a list of locations, please refer to the [Carrying Concealed Handguns On Campus](#) document and/or consult your event organizer.

Pursuant to PC 46.035, the open carrying of handguns is prohibited on all East Texas A&M University campuses. Report violations to the University Police Department at 903-886-5868 or 9-1-1.

East Texas A&M Supports Students' Mental Health – Counseling Services

The Counseling Center at East Texas A&M University, located in the Halladay Building, Room 203, offers counseling services, educational programming, and connection to community resources for students. Students have 24/7 access to the Counseling Center's crisis assessment services by calling 903-886-5145. For more information

The syllabus/schedule are subject to change.

regarding Counseling Center events and confidential services, please visit www.tamuc.edu/counsel

Mental Health and Well-Being

The university aims to provide students with essential knowledge and tools to understand and support mental health. As part of our commitment to your well-being, we offer access to Telus Health, a service available 24/7/365 via chat, phone, or webinar. Scan the QR code to download the app and explore the resources available to you for guidance and support whenever you need it.

As an Institutional Member of the National Association of Schools of Music, East Texas State A&M University supports the Association's commitment to student health and wellness. The following web address provides links to information for resources related to physical and mental well-being, as well as assists in offering preventative measures that students can take to avoid serious and/or chronic conditions: [Musician Health and Safety - East Texas A&M University](#)

Department and Accrediting Agency Statement:

School of Music Mission Statement:

The School of Music at East Texas A&M University promotes excellence in music through the rigorous study of music history, literature, theory, composition, pedagogy, and the preparation of music performance in applied study and ensembles to meet the highest standards of aesthetic expression.

The syllabus/schedule are subject to change.
