### Course Information

**Lectures (Web Based Class):** Meets 7/6/2026 through 8/6/2026

**Required Textbook:** Introduction to General, Organic, and Biochemistry, 11th Edition, Brooks/Cole, Cengage Learning; ISBN-13: 978-1-285-86975-9; by Bettelheim, Brown, Campbell, Farrell, Torres.

**Course description, objectives, and learning outcomes** (3 credit hours, lecture only).

This course is designed for students majoring in Agricultural Science, Wildlife and Conservation science, the Environmental Sciences, Nursing and non-majors seeking an understanding of chemistry and its applications in human health, agriculture and the environment. The course examines the principles, nomenclature, reactions and methods of synthesis of organic compounds. Special attention is given to the application of organic chemistry to various biological processes. The course is designed to develop and improve the student's ability to think critically and solve problems. Thus, a letter grade earned in this class not only reflects the student's knowledge of basic organic chemistry, but also reflects the student's ability to solve scientific problems based on available information, and to become a better scientist.

**Prerequisite:**

Prerequisites: CHEM 1305, CHEM 1405, CHEM 1411, or CHEM 1412.

**Grading/Evaluation**

Your course grade will be based on exams and quizzes. Three partial exams are worth 60% of your final grade with 20% for each partial exam. The quiz will be 15% of your final grade. A course comprehensive standardized final exam is worth 25% of your final grade.

The grade for this course will be derived as follows:

Three examinations	60 %
Quiz	15%
Final Comprehensive Exam	25 %

**Late work will not be accepted, and makeup quizzes or exams will not be given.** NO make-up exams will be offered. If you miss a midterm for a reason beyond your control, you may request in writing to be excused from that exam providing you have valid written documentation supporting your reason.

**The last drop date for the course please sees the website:**<http://www.tamuc.edu/Admissions/registrar/academiccalendars/>

Grading will be based on a standard percentage scale: 100-87 = A; 86-78 = B; 77-68 = C; 67-58 = D; 57-below =F. Dishonest scholarship will earn an automatic zero (0) and initiate prosecution

to the fullest extent. Incomplete grades may be given only if the student has a current average above 70% and is precluded from completion of the course by a documented illness or family crisis.

**Student Responsibilities or Tips for Success in the Course:** This is an online class therefore attendance is flexible! You are required to access D2L while you participate various activities. Your regular participation activities, login times, visit time spent will be checked regularly. You are strongly encouraged to log into the course several times a unit. Excessive “absence” in online activities may result in loss of points (including in your overall performance points).

**Pointers to Succeed in CHEM 1307:**

1. The lectures in this course will cover Chapters 10-22 of the assigned textbook. This material will be covered at the rate indicated by the Tentative Class Schedule. Be sure to read the textbook ahead the lectures. The lectures will focus on important chemistry concepts but will not serve as a substitute for reading the textbook. The textbook is a more detailed presentation with a more extensive set of example problems.
2. Finish your homework promptly. Working the problems will help you succeed in the course. The more problems that you work the better prepared you for exams.
