Course Description

This course provides an overview of research methodology to include core concepts and common procedures employed in quantitative and qualitative research methods.

The syllabus/schedule are subject to change.

Student Learning Outcomes

At the end of the course, engaged students will be able to:

1. Understand what research is and how it differs from other types of studies, such as an evaluation or technical report.
2. Understand the overall research procedures.
3. Compare the use of quantitative, qualitative, and mixed-methods research and describe the characteristics of each type of research method and their application.
4. Describe ethical guidelines in conducting research and for the protection of human subjects of research projects.
5. Conduct a literature review locating and retrieving relevant studies related to a topic of research interest.
6. Define research problems and develop a research purpose and research questions.
7. Define and select an appropriate research design for various research problem, including quantitative, qualitative, and mixed methods designs.
8. Determine the use of data collection methods and identify appropriate data collection instrument or protocol.
9. Describe the concepts for analysis of data in quantitative and/or qualitative research.

COURSE REQUIREMENTS

Course Expectations and Participation:

Active participation in this web-based course is expected. It is recommended that students log into the course module weekly to stay on track with the assigned reading materials, discussion post, assignment, and project.

Students are expected to take an active learning approach in this course and engage in the content to positively impact the learning experience for everyone.

Complete all discussion posts, assignments, and papers by deadlines.

Incorporate knowledge gained from the text, personal experiences, peers' feedback, and other resources to formulate ideas on your responses.

Course Assessments

This course is made up of a series of module assignments and assessments to assist students in achieving the learning outcomes. In each module, the students will work on combinations of reading, discussions, journal articles, videos, and/or self-study research.

Student Introduction (5%): Students will create a video to introduce themselves. Students can either create the video using the Panopto application or any other tool of their choice. The Panopto application may refer to the resource that is available in the Doc Sharing folder. Please refer to Module 1 for the information that needs to include in the video.

Pre- and Post-Course Survey (2.5% each): Students will complete a pre-course survey at the beginning of the course to share their thoughts and understanding about research methodologies. At the end of

The syllabus/schedule are subject to change.

the semester, student will complete a post-course survey to share their feedback and reflections on research methodologies. Follow the “Course Calendar” for the due date of this assignment.

Discussion Board (5% each): For each discussion thread topic, students will be required to post an “initial” post and at least two “replies” to their fellow peers’ posts. When posting the initial post and replies to peers’ posts, think about how the content adds substance or meaning to the discussion topic. For peers’ replies, it is strongly discouraged saying simple “yes, I agree” or “I disagree”. Students need to explain why they agree or disagree and provide examples, experiences, resources, alternative perspectives, challenging views, etc., to make the dialogue richer. Follow the “Course Calendar” for the due date of the assignment.

References Assignment (5%): Students will develop a reference page with 10-12 scholarly peer reviewed sources that will be used for the research plan using APA (7th ed.) guidelines. Refer to the course module for further instructions. Follow the “Course Calendar” for the due date of the assignment.

Research Design Critique Reports (10% each): One objective of this course revolves around learning about different types of research designs. In Module 3 and 4, students will complete a research design report to assess their understanding of the different designs. Follow the “Course Calendar” for the due date of the assignment.

Research Plan (30%): The core of this course is the development of a research plan. Through the analysis of appropriate research literature, students will identify a problem that they wish to further investigate. The problem needs to be one that is “researchable” and related to an area in their program of study or profession. Throughout the semester, students will conduct a series of activities to assist them in developing and refining their research topic and completing a formal research plan. Follow the “Course Calendar” for the due date of the assignment.

Course Grades

Grading Policy: The course grade consists of

Student Introduction	5%
Pre- & Post-Course Surveys	5%
Discussion Posts	35%
Reference Assignment	5%
Research Design Reports	20%
Research Plan	30%
Total	100%

Final grades in this course will be based on the following scale:

A = 90%-100%

B = 80%-89%

C = 70%-79%

D = 60%-69%

F = 59% or Below

The syllabus/schedule are subject to change.

If you are having technical difficulty with any part of Brightspace, please contact Brightspace Technical Support at 1-877-325-7778. Other support options can be found on the [Brightspace Support Webpage](#).

COMMUNICATION AND SUPPORT

Interaction with Instructor Statement

If you have any questions or are having difficulties with the course material, please contact your instructor. Correspondence will always be through university email (your “myLeo” mail) and announcements in myLeo online (D2L). You will not RECEIVE email through D2L, so be sure to check your ETAMU email for communication. Students are encouraged to check university email daily.

Include the Following in Emails with Instructor:

- Course name and subject in the subject line
 - Salutation (Good afternoon, Dr. Jackson)
 - Proper email etiquette (no “text” emails – use proper grammar and punctuation)
 - Student name and CWID after the body of the email (possibly add to student signature on email)

COURSE AND UNIVERSITY PROCEDURES/POLICIES

Syllabus Change Policy

The syllabus is a guide. Circumstances and events, such as student progress, may make it necessary for the instructor to modify the syllabus during the semester. Any changes made to the syllabus will be announced in advance.

Student Conduct

All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment. The [Code of Student Conduct](#) is described in detail online in the [Student Guidebook](#).

Students should also consult the [Rules of Netiquette Webpage](#) for more information regarding how to interact with students in an online forum.

ETAMU Attendance

The syllabus/schedule are subject to change.

For more information about the attendance policy, please view the [Attendance Webpage](#) and the [Class Attendance Policy](#)

Academic Integrity

Students at East Texas A&M University are expected to maintain high standards of integrity and honesty in all their scholastic work. For more details and the definition of academic dishonesty see the following procedures:

Use of Artificial Intelligence

East Texas A&M University acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources

Students with Disabilities-- ADA Statement

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:
