Course Description

VETT 330 Imaging for Veterinary Technicians

Presentation of theory and principles and practical application of radiology within the field of veterinary medicine. The student will implement and follow recommended safety procedures; prepare and use technique charts; take and process diagnostic radiographs using stationary and portable X-ray machines; properly care for radiographic equipment; and label, file, and store radiographs

Student Learning Outcomes

1. Students will demonstrate the ability to follow radiation safety procedures.
2. Students will effectively be able to obtain diagnostic radiographs using stationary X-ray machines.
3. Students will be able to prepare and use technique charts.
4. Students will be able to evaluate and maintain all radiographic equipment including PPE, imaging plates/receptors, positioning devices, and DICOM system
5. Students will be able to identify, use, and maintain other diagnostic imaging modalities such as ultrasound and endoscopy equipment.
6. Students will learn their roles as veterinary technicians, team members, and client education in a laboratory, clinical, and diagnostic setting.

COURSE REQUIREMENTS

Minimal Technical Skills Needed

Using the learning management system, using Microsoft Word and PowerPoint, using presentation and graphics programs, etc.

Instructional Methods

This course will be using the D2L learning platform. D2L is how lectures content, assignments, discussions and quizzes/tests will be delivered. This course is face to face interaction due to the level of task/skills required by the AVMA.

Student Responsibilities or Tips for Success in the Course

Regularly logging into the course website, approximately 2 hours of weekly study and 2 hours of participation time expected. These anticipated times are an estimation and may require more or less.

- The student is responsible for being familiar with all material presented in lectures, readings, learning activities, and quizzes.
- The student is expected to participate in all course activities and complete all examinations and course assignments on time.
- Any changes in the course schedule, such as examination dates, deadlines, etc., will be announced ahead of time on the d2L website.

The syllabus/schedule are subject to change.

- It is the student's responsibility to be informed of these changes The syllabus/schedule are subject to change. It is the students responsibility to be informed about deadlines concerning registration (e.g., last day for withdrawal).
- Communication: The instructor will communicate with students through email, appointment, and/or D2L.

GRADING

The final grade in the course will be based on your accumulated total points during the semester according to the following distribution:

A = 900 - 1000 Points

B = 800 - 899 Points

C = 700 - 799 Points

D = 600 - 699 Points

F = 599 & below

Course grades come from:

4 lecture unit exams @ 100 points each	400 points
1 lecture final exam @ 150 points	150 points
5 Lecture assignments @ 10 points each	50 points
Written Lab Midterm	150 points
Written Lab Final	200 points
5 lab assignments @ 10 points each	50 points
1 AVMA skill list	Pass/Fail
TOTAL	1000 points

1. Attendance

- You are expected to come to class every meeting.
- Excessive absences will result in a deduction of overall course points.
- Excused absences must be discussed with the professor within 48 hours of a missed class, preferably before.

2. Assignments/ Worksheets

- Late submissions: Submissions will be due at a specified date and time. Any time after the due date, the homework is considered late and will receive an automatic 15% reduction in the final score and a 5% reduction each day beyond the due date.

Assessments

The syllabus/schedule are subject to change.

Lab Exams will consist of a midterm and final, both with written and practical portions. The final will be comprehensive/cumulative and will be given during lab time on: Time and Location TBA
Lecture exams, unit and final, will include T/F, matching, multiple choice, multiple answer, identification, and short answer. These are to be completed and submitted online by the due date. The exams are timed and you will have only one attempt.

Assignments

Lecture and Lab will have assignments that are to be completed and submitted by the specified due date. The assignments will be related to material, enforcing the content being presented at the time.

Skill List

This lab contains an AVMA required task/skill list that must be completed and submitted to pass the course. If it is not submitted, you will not pass regardless of your overall point accumulation in the course. All skills listed will be part of the weekly lab material.

AI use policy [Draft 2, May 25, 2023]

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
