INSTRUCTOR INFORMATION

Instructor: Dr. Nicole Farris, Professor

Office Location: Ferguson Room 218

Office Hours: by appointment

University Email Address: Nicole.Farris@etamu.edu

Preferred Form of Communication: **Email**

Communication Response Time: 24 to 48 Hours, M-F, 8am to 5pm

COURSE INFORMATION

Materials – Textbooks, Readings, Supplementary Readings

Textbook(s) Required:

Neuman, W. Lawrence. *Social Research Methods: Qualitative and Quantitative Approaches* (8th ed.). Pearson.

Software Required

Optional Texts and/or Materials

The syllabus/schedule are subject to change.

This course covers the basic techniques and procedures used in the social research process. Special attention is given to defining research problems, selecting and measuring variables, stating hypotheses, developing sampling designs, and gathering data. Students are exposed to methodological designs such as experimentation, observation, content analysis, evaluation research, and survey research.

Upon successful completion of this course, students will be able to:

1. Identify and evaluate key research methods used in sociological research.
2. Formulate sociological research questions and corresponding hypotheses.
3. Design appropriate sampling methods and measurement tools for empirical studies.
4. Compare and contrast qualitative and quantitative data collection techniques.
5. Develop a research proposal that integrates ethical considerations and methodological rigor.
6. Critically assess the validity and reliability of existing and proposed studies.

COURSE REQUIREMENTS

Students should be proficient in basic computer skills, including word processing, email communication, navigating online learning platforms (D2L), and the use of video conferencing tools such as Zoom.

This course is delivered fully online. Instructional methods include weekly readings, lectures, discussion forums, application assignments, peer feedback, and the development of a cumulative research proposal.

To succeed in this course, students should keep up with weekly readings, participate actively in discussions, engage with peer feedback, and dedicate time each week to building their final research proposal. Time management and communication with the instructor are key to staying on track.

GRADING

Final grades in this course will be based on the following scale:

Total points corresponding to the final letter grades

A: 90% - 100% (405 to 450 points) B: 80% - 89% (360 to 404.9 points) C: 70% - 79% (315 to 359.9 points) D: 60% - 69% (270 to 314.9 points) F: Below 60% (Under 270 points)

The syllabus/schedule are subject to change.

Assessments

Total: 450 Points

1. Weekly Assignments (14 × 10 pts each) – 140 points

Short assignments aligned with each week's content (e.g., topic proposal, sampling plan, codebook draft, observation write-up). Each task is worth 10 points.

2. Participation & Discussion (6 × 10 pts each) – 60 points

Selected weeks will include brief discussion prompts or peer feedback posts. These are low-stakes but designed to promote engagement and peer learning.

3. Research Proposal Draft – 50 points

Submitted in Week 15. Should include: intro, research questions, literature outline, and methods.

4. Research Proposal Final – 150 points

Final polished proposal (10–15 pages), submitted in Week 16. Includes all standard research components.

5. Feedback on Course – 20 points

Provide constructive feedback on the course using a guided rubric or prompt.

6. Quizzes/Annotated Bibliography (2 × 15 pts) – 30 points

Short quizzes on research paradigms/ethics (Week 2) and submit an annotated bibliography (Week 13).

Late Work Policy: Late work will be accepted without question for up to one week after the original due date and will be subject to a 10% penalty. Assignments submitted more than one week late will not be accepted unless prior approval has been granted by the instructor. Please reach out as early as possible if you anticipate needing additional time.

However- if you turn in your rough draft late, I will NOT be able to give you feedback before your final paper is due, so please keep this in mind.

AI IN DR. FARRIS' CLASSROOM

You're welcome to use AI tools (like ChatGPT), Grammarly, or similar support services in this class—as long as you're using them the way you'd use me: as a resource to support your learning, not as a shortcut to avoid doing the work.

Think of it like this:

Would you ask me to write your discussion post for you?

Would you ask me to complete your final project or reflection?

Probably not—and if you did, I'd (kindly) say no!

But would you ask me to help brainstorm ideas, explain a sociological concept, give feedback on a rough draft, or suggest ways to structure your response?

Absolutely. That's using support in a way that still keeps the work (and the learning) yours.

If you do use any AI tools (including Grammarly or ChatGPT), you must note it at the bottom of your assignment.

The syllabus/schedule are subject to change.

Just a short line is fine—for example:

- “I used Grammarly to check grammar and clarity.”
- “ChatGPT helped me outline my initial ideas for this post.”
- “I asked ChatGPT to explain symbolic interactionism in simpler terms.”

Being transparent helps build trust and keeps our academic work ethical and clear.

If you’re ever unsure whether you’re using AI appropriately, just ask yourself: *Is this something I would ask my professor to do for me?*

If the answer is yes, you’re probably on the right track.

AI use policy [Draft 2, May 25, 2023]

Texas A&M University-Commerce acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors’ guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
