functions, and skills in preparing and communicating evaluation findings.

Student Learning Outcomes

The purpose of the doctoral program is to produce a graduate who has developed breadth of vision, a capacity for interpretation, and the ability to carry out critical investigations. The doctoral student is expected to gain many new concepts, zeal for adding to the sum of human knowledge, and the ability to conduct original research and to think clearly and independently. The student must also develop the professional competencies necessary for the application of knowledge in the essential areas of human and public interest. Guidance toward extended reading and research is an integral part of graduate study. To assist students in achieving the state purposes of the doctoral program, the following goals/objectives have been developed for this course. Upon successful completion of this course, students will:

1. Demonstrate the purposes and importance of educational program evaluation.
2. Analyze the interdependent relationship between the dimensions of management and evaluation.
3. Differentiate between a variety of program evaluation models and the individuals associated with their development and use.
4. Compare and contrast historical and current literature in the area of program evaluation.
5. Apply the knowledge and skills of evaluation to existing programs and the planning of new programs.
6. Evaluate a variety of measures/data gathering techniques available for use in program evaluation.
7. Assess the complexity of the relationships between educational program evaluation and other elements, including, but not limited to, ethics, politics, communication, finances, decision-making, curriculum development and implementation, staff development, accreditation, school reform/restructuring, and teacher evaluation.

AI use in course [Draft, May 25, 2023]

East Texas A&M University acknowledges that there are legitimate uses of Artificial Intelligence, ChatBots, or other software that has the capacity to generate text, or suggest replacements for text beyond individual words, as determined by the instructor of the course.

Any use of such software must be documented. Any undocumented use of such software constitutes an instance of academic dishonesty (plagiarism).

Individual instructors may disallow entirely the use of such software for individual assignments or for the entire course. Students should be aware of such requirements and follow their instructors' guidelines. If no instructions are provided the student should assume that the use of such software is disallowed.

In any case, students are fully responsible for the content of any assignment they submit, regardless of whether they used an AI, in any way. This specifically includes cases in which the AI plagiarized another text or misrepresented sources.
