COURSE

DESCRIPTION: This course is designed to investigate the techniques of the research process as applied to business. Experience is gained in defining research problems, designing a research project, and collecting, analyzing, recording, and interpreting data. Emphasis is placed on utilizing Microsoft Excel to organize and analyze data, communicating findings to senior managers in a concise written format, and presenting results verbally.

PREREQUISITE: Students are expected to take this class with energy and enthusiasm to learn.

COURSE OBJECTIVES:

Upon completion of this course, students will:

1. Students will demonstrate the ability to develop a research plan, including a problem statement, hypotheses, related literature, and methodology. (COB 1 – Presentation)
2. Students will learn how to write concise digests of the key insights from research findings in a manner that senior managers will be able to use. (COB 2 – Assignments)
3. Students will demonstrate the ability to use appropriate secondary data to solve business problems worldwide.
4. Students will develop an appreciation for the importance of quantifying business decisions.
5. Students will have comprehensive statistical skills that are necessary for performing basic

business analysis.

ATTENDANCE POLICY: Attendance is mandatory

MAKE-UP POLICY: Unless there is an officially documented reason for missing a quiz/assignment/presentation, no make-ups will be allowed.
