COURSE INFORMATION

Course Description

HUM 2301: The Human Experience introduces students to humanities-based inquiry by guiding students through an exploration of important humanistic questions across all elements of the human experience. Through the deep focus on a connecting theme, students will engage in holistic discussions of topics addressing fundamental questions about human life and human interactions, develop the skills of humanistic inquiry (including critical thinking, research, literacy skills, and communication skills), and learn to apply their knowledge to their personal, professional, and academic goals.

This course is the foundational course for the Human Experience Humanities Certificate program, a grant-funded, TAMU System-wide initiative designed to create an intentional connective pathway through the core curriculum to infuse the humanities and humanities-based inquiry (critical thinking, research, communication, ethics, morality, cultural awareness, empathy, etc.) into student degree pathways and encourage students to see the relationships between larger questions of the human experience and their own lives and goals. The course is based on Transformative Texts and a Transformative Project.

The syllabus/schedule are subject to change.

For this particular section of the course, our thematic focus will center on the roles of work, play, and leisure in connection to the human experience. Who we are and what we are directly engage the things we do in the everyday. Inherently, work and leisure intertwine and the ways we negotiate task, time, and priorities reflect cultural, social, and historical foundations.

Transformative Project: The Transformative Project will ask students to take a theme from the course, engage in research about that topic, identify relevant sources, present an argument, and link the outcomes to an issue relevant to their own career or personal trajectory. The Transformative Project aligns with and assesses all Student Learning Outcomes for the course. The Transformative Project should engage students in the use of Adobe Creative Cloud.

Mission Statement for the Human Experience Program

- Students will explore their own agency and recognize how they are responsible for their success in their college experience, careers, and lives
- At the same time, they will contextualize, reflect on, and share their experiences and perspectives in their communities.
- In doing so, they will examine differing perspectives, which will lead to two interconnected ideas: seeing different perspectives develops empathy and Individual student voices and creativity add to larger cultural understandings of the world and the human experience.
- We will examine how “texts” transform not just individual lives but also the ways that groups of people perceive and understand the world.

Materials – Textbooks, Readings, Supplementary Readings

The readings for this course are partially drawn from a system-wide list of Transformative Texts. **Transformative Texts** are books, films, artwork, music, documents, memoirs, etc. from diverse regions, cultures, ethnicities, ideologies, religions, genders--around the world and through time--that reflect the core ideals, ethics, and moralities of the human experience.

Readings for this section of HUM2301:

Required Readings for this section of Human Experience: Work, Play, and Leisure:

- Max Weber (1904): *The Protestant Work Ethic and the Spirit of Capitalism*
- Thorstein Veblen (1899): *The Theory of the Leisure Class*
- Roger Caillois (1958): *Man, Play, and Games*
- Johan Huizinga (1949): *Homo Ludens: A Study of the Play-Element in Culture*
- Erving Goffman (1956): *Presentation of Self in Everyday Life*

All readings will be distributed via our course shell in D2L. There are no required purchases.

Student Learning Outcomes

The focus of this class is to build student skills in critical analysis and communication by developing students' ability to think critically, empathetically, and holistically about big issues

The syllabus/schedule are subject to change.

and to develop, hone, and communicate their ideas about those big issues. The common student learning outcomes for this course are:

1. Critical/Integrative Thinking: Students will apply insights from the humanities (i.e., examinations of human history, culture, language, ethics, and aesthetics) to problems or questions that intersect with other areas of inquiry, including STEM and professional disciplines. (Core Outcome Alignment: Critical Thinking)

2. Communication: Students will communicate ideas effectively through writing and, where appropriate, through oral communication, visual communication, or creative performance. (Core Outcome Alignment: Communication)

3. Ethical Reasoning: Students will engage with multiple perspectives in exploring the human dimensions of real-world situations and problems. (Core Outcome Alignment: Personal Responsibility; Critical Thinking)

4. Cultural Awareness: Students will demonstrate an appreciation for social and cultural diversity while engaging in critical analysis of various forms of literary, artistic, or cultural expression. (Core Outcome Alignment: Social Responsibility; Critical Thinking)

Student Learning Outcomes will be assessed by the Transformative Project, presented during the Learning Showcase held on the Wednesday of Exam Week, 3-5pm. Students will present their projects during one hour of that time and are required to attend as assigned.

This course also fulfills the Phase I requirements of the University QEP through the completion a Competencies Pre-Reflection, a Competencies Post-Reflection, and the Focus2 Career Assessment.

COURSE REQUIREMENTS

Instructional Methods and Assessment

This course will be centered on classroom discussion of assigned works, using small group and large group discussions, with short low-stakes writing and reflection assignments that scaffold to a final Transformative Project. The Transformative Project showcases student learning and development of humanities skills, including information literacy, critical thinking, and communication. Students will read, discuss, listen, analyze, and develop an understanding of the assigned texts and their connections to their own lived experience, goals, and beliefs; conduct research; and communicate their ideas. In engaging with the core learning objectives of critical thinking, communication, social responsibility, and personal responsibility, students will gain a greater appreciation of the complexities of the world and their place within that complexity, and gain new skills derived from deep textual reading and analysis, critical thinking and engagement, research and information literacy, and the ability to communicate their ideas. These skills provide a key foundation for the college experience and will bolster students' employability after graduation.

The syllabus/schedule are subject to change.

To prepare for and develop the Transformative Project, students will engage in short writing, research, and oral presentations that provide a scaffolded foundation for their final project, as set out in the Course Schedule. Through reflective assignments, students will develop a project focus that sets out the large issue drawn from their study of the chosen Transformative Text and the relevance students find to their lives and goals. They will conduct research on different approaches to that large issue to understand in a holistic sense the different perspectives on the large issue, and make arguments about how such different perspectives might shape a society's understanding of the issue. Students will prepare a product that articulates the connections between the larger issue they researched and discussed and their own lives, goals, and experiences. The final Transformative Project will be presented at the Learning Showcase using the Adobe Creative Campus suite of programs, in a format that makes the most sense to students, to allow them creativity of expression in making the connections between their humanities inquiry and their personal experiences.

Throughout the course, discussions and assignments will be geared to reinforcing the basic premises of university education and to emphasizing students' development of skills central to their college career and beyond—exposing students to new ideas, different perspectives, and the variability of the human experience; developing relationships between and among students, mentors, and faculty; reinforcing persistence and resiliency; encouraging reflection and sense of purpose; and honing reading, writing, and communication skills.

Assignments, Student Responsibilities, Expectations, and Tips for Success

Actions included in achieving the student learning outcomes include:

Participation and Engagement: Whether in the classroom or online, students are expected to dialogue in a way that provokes, clarifies, challenges, and enlightens the course community. In these communications, the concepts of a liberal studies approach to higher education will be practiced and varying interpretations, particularly in relation to the course readings, will be shared.

Additional considerations of a student's relative level of engagement and academic integrity will also be made across all aspects of the course including but not limited to completion and quality of tasks and assignments, communications, following instructions and guidelines, and accessing materials. Engagement reflects SLO's 1-4.

Content Reflections: At three points in the semester, students will reflect on the course as a whole as informed through course content. These reflections reflect SLO's 1-4.

One-on-one meetings: At two points in the semester, students will meet individually to talk through course content, the planning of transformative projects, and the human experience of being a student in HUM 2301. This reflects SLO #2.

Triad Support Events: occurring during class sessions, small activities will be assigned and to be completed with the help of your particular triad. The support events reflect SLO's 1-4.

The syllabus/schedule are subject to change.

Workview and Mission Statement: In essence, one is declaring one's philosophy of work, leisure, and life balance. From that philosophy, one will craft a personalized mission statement. This assignment reflects SLO's 1 and 2.

World Work and Play Project: The world extends far beyond East Texas. This task will have the student select some artifact/element of non-Western popular culture tied to work and/or play not formally covered within the course and familiarize themselves with both the object's history as well as to its geocultural significance. This will then be conveyed through the creation of a shareable form, be it document, recorded presentation, or other alternative means of communication. This task reflects SLO's 1-4.

Transformative Project: The Transformative Project will ask students to take a theme from the course, engage in research about that topic, identify relevant sources, present an argument, and link the outcomes to an issue relevant to their own career or personal trajectory. The Transformative Project aligns with and assesses all Student Learning Outcomes for the course. The Transformative Project should engage students in the use of Adobe Creative Cloud.
