

## Accepting Cookies On Safari

At times one might run into difficulty accessing a page or desired location. One reason that such difficulties might occur may be due to the security settings on the computer in use. If the computer is not set to accept cookies, a page may be blocked. In order to accept cookies, and hopefully access the desired location, the following steps can be taken:

1. Start by selecting **Safari** on the home toolbar

2. Then click **Preferences**. The following Security window will pop up.

3. Click the option to accept cookies **Always**. (Exit. You are done!)
