HUMOR AND ARTIFICIAL INTELLIGENCE

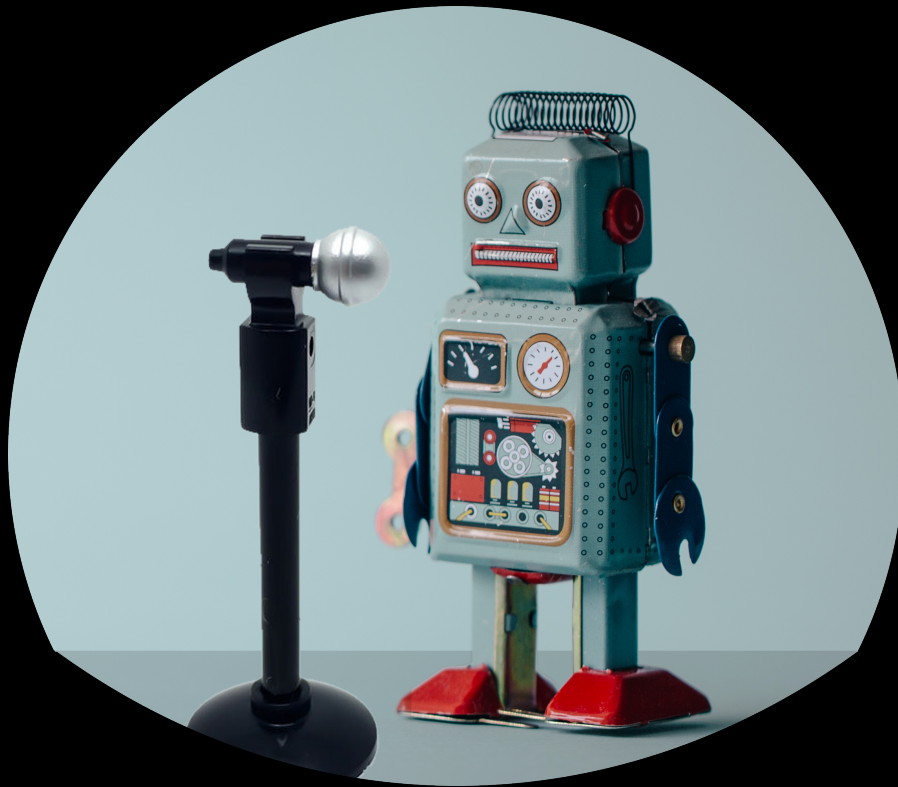

PANEL AT THE 2019 CONFERENCE OF THE INTERNATIONAL SOCIETY FOR HUMOR STUDIES

Austin, TX, USA • June 24–29, 2019

www.tamuc.edu/ishs2019

CALL FOR PAPERS

Humor is a universal and ubiquitous facet of human communication, but is among the hardest to process in artificial intelligence environments. The 2nd Panel on Humor and Artificial Intelligence at ISHS 2019 solicits abstracts on the computational representation, detection, classification, interpretation, and generation of any and all forms of verbal or non-verbal humor.

Application areas include, but are not limited to:
• human−computer interaction
• computer-mediated communication
• intelligent writing assistants
• conversational agents
• machine and computer-assisted translation
• digital humanities
• natural language processing
• computer vision

Submission deadline: March 15, 2019
