

# The Evolution of Humor Caused by Technological Innovation

---

By TAMUC Graduate Student Abby Diaz

Adviser– Salvatore Attardo

# Jokes vs. Memes – Word Count

---

- In this study, the average word count was found of 100 jokes randomly chosen from the book *The Penguin Book of Australian Jokes*; the same was done with 100 memes taken from two websites:
  - <http://www.srune.com/lists/top-100-funny-memes/154/>
  - <https://www.complex.com/pop-culture/2012/06/the-100-greatest-internet-memes-of-all-time/the-most-interesting-man-in-the-world>

# Jokes vs. Memes – Word Count

Joke 1	52	Meme 1	18
Joke 2	195	Meme 2	8
Joke 3	125	Meme 3	13
Joke 4	58	Meme 4	0
Joke 5	208	Meme 5	0
Joke 6	91	Meme 6	22
Joke 7	154	Meme 7	25
Joke 8	38	Meme 8	4
Joke 9	55	Meme 9	14
Joke 10	121	Meme 10	3
Joke 11	66	Meme 11	15
Joke 12	221	Meme 12	11
Joke 13	32	Meme 13	16
Joke 14	194	Meme 14	7
Joke 15	48	Meme 15	7
Joke 16	63	Meme 16	10
Joke 17	119	Meme 17	10
Joke 18	73	Meme 18	6
Joke 19	78	Meme 19	12
Joke 20	69	Meme 20	4

Joke 21	73	Meme 21	13
Joke 22	69	Meme 22	5

Joke 77	49	Meme 77	20	Joke 97	18	Meme 97	9
Joke 78	49	Meme 78	5	Joke 98	15	Meme 98	11
Joke 79	32	Meme 79	13	Joke 99	16	Meme 99	17
Joke 80	32	Meme 80	18	Joke 100	23	Meme 100	16

Average word count  
for the 100 jokes –  
**60.79**

Average word count  
for the 100 memes –  
**9.79**

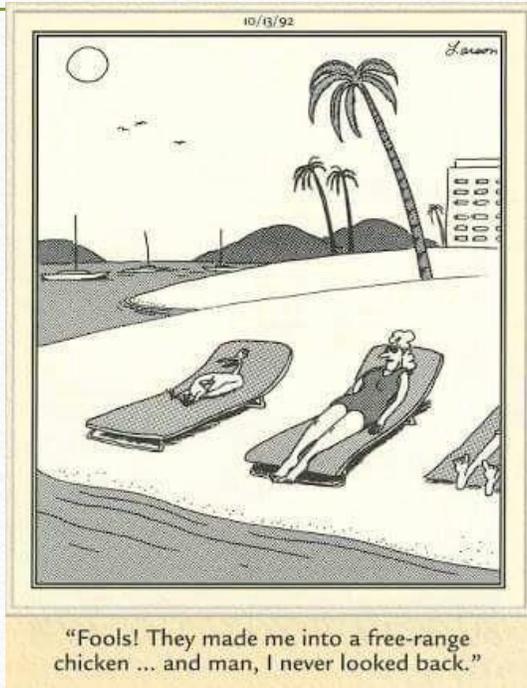

# A Picture is Worth a 1000 Words

---

- In their paper on jokes as a text type, Attardo and Chabanne (1992) explain how humorous points can be created by the interaction of visuals and text.
- Some visuals are independently humorous, such as the picture on the right.

# A Picture is Worth a 1000 Words

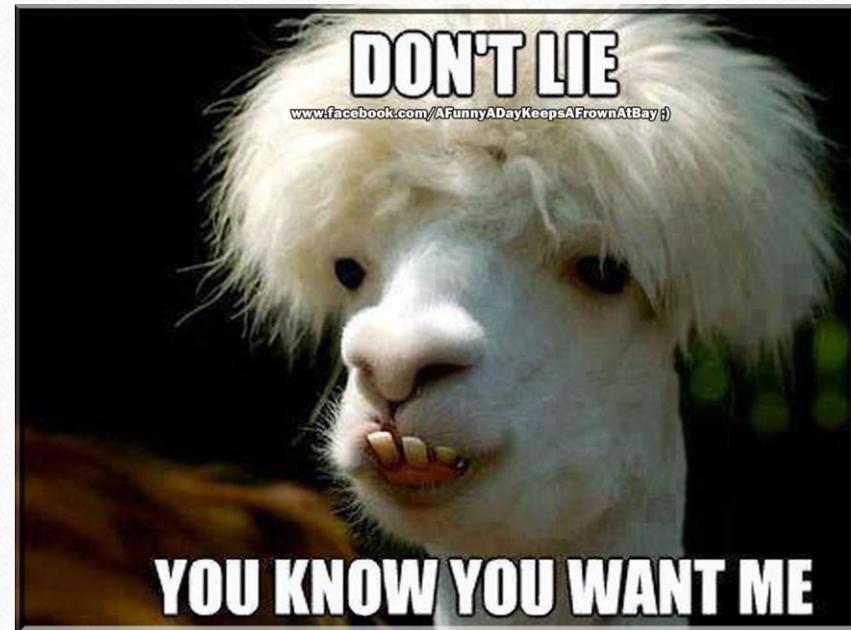

- In other cases, the visual requires the accompaniment of humorous text.
- Take, for example, the *Far Side* cartoon to the left. If the text were removed, the cartoon would no longer be humorous (strange, perhaps, but now humorous). In cases like this, the visual serves as an introduction to the situation.

# A Picture is Worth a 1000 Words

---

The opposite can occur as well. Humor can be created by a normal caption that is accompanied with an incongruent visual.

# A Picture is Worth a 1000 Words

- In her book, *The Language of Jokes in the Digital Age*, Delia Chiaro (2018) claims that we have shifted from slow humor to fast humor, saying that we live in a fast moving, online world that quickly grows tired of yesterday's news.
- I propose that this is related to the finding that memes tend to be strikingly shorter than more traditional jokes. With an abundance of sources of humor at one's finger tips, it is plausible that the current generation does not want to spend much time on any one source.

# Instant Gratification

With less or nothing at all to read (or hear), is this type of humor simply a result of a fast-paced environment that is geared toward instant gratification? (An environment that has been largely created by the internet) Has the modern mind been trained to expect things instantly, and with minimal effort? If so, does it stand to reason that the current generation simply does not want to wait or put forth effort for more than a few seconds to enjoy their humor? Or is it that humans have typically always preferred visuals over text when it comes to humor, and that the current technology is simply enabling a manifestation of this preference?

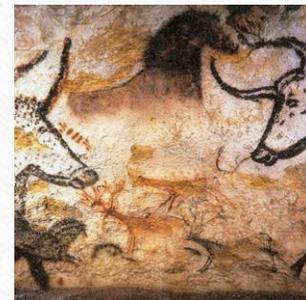

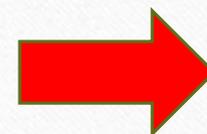

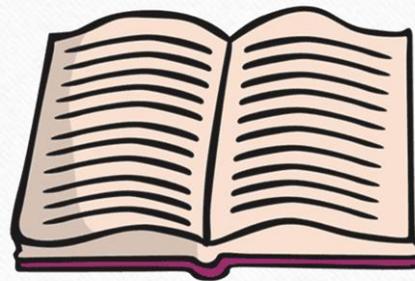

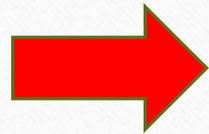

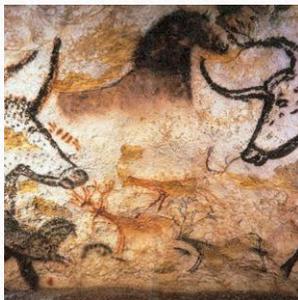

# A Return to a Pre-literate Culture?

According to an article published by the University of Texas at Arlington (2015), there was a 10% drop in the U.S. literacy rate between the years 1982 and 2002. They go on to say that many researchers cite the rapid increase of other types of entertainment media as the cause (in addition to educators failing to encourage students to develop a daily habit of reading.)

# A Return to a Pre-literate Culture?

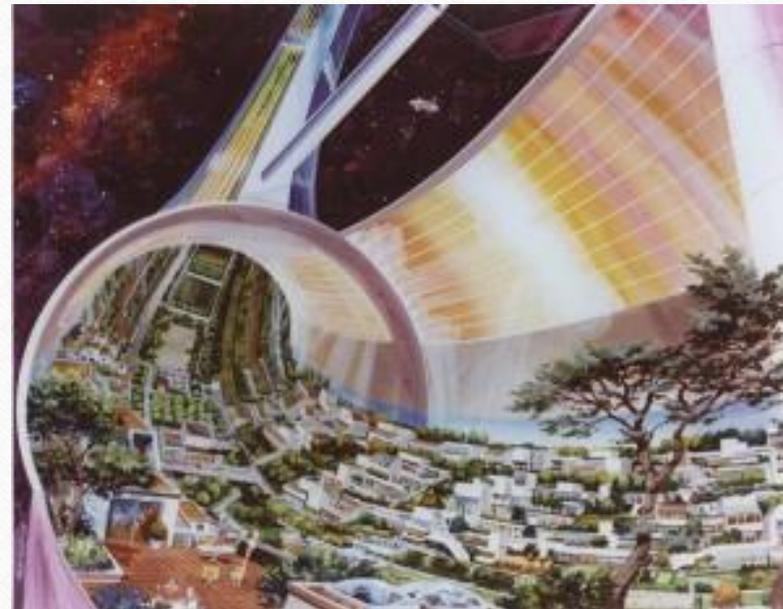

With phenomena such as the joke/meme word count ratio of about 6 to 1 found in this study; a decrease in literacy rates due partially to advances in technology; and inventions such as Siri and Alexis that are verbally activated, is it reasonable to speculate that our current technological innovation is generating, at least in part, a return to a pre-literate, visual culture in regards to both humor and the culture as a whole?

# Or Progress to a Tertiary Orality?

---

- According to Turner and Allen (2013) we may be on the verge of a “tertiary orality” (an interdependence with technology.)
- They point out that our secondary orality (literacy) brought about major changes such as the Industrial Revolution.
- If we do reach a tertiary orality, what changes might it bring to our daily lives? Will the language of humor be completely different than it was just 30 years ago?
