Satire, Humor, and Environmental Crises

Massih Zekavat and **Tabea Scheel**

Series: Routledge Explorations in Environmental Studies

This book explores how satire and humor can be employed to address and mitigate ecological crises at individual and collective levels. It reassesses environmental behavior and messaging and explores the promises of humorous and satiric communication therein. It draws upon a solid and interdisciplinary theoretical foundation to explicate the individual, social, and ecospheric determinants of behavior. Creative works of popular culture across various modes of expression, including *The Simpsons*, *Last Week Tonight with John Oliver*, and *The New Yorker* cartoons, are examined to illustrate the strong if underappreciated relationship between humor and the environment. This book will be of great interest to students and scholars interested in environmental humanities, communication science, psychology, and critical humor studies. It can further benefit environmental activists, policymakers, NGOs, and campaign organizers.
