TEXTBOOK:

Probability and Statistics for Engineers and Scientists, 9th Edition by Walpole, Myers, Myers, and Ye, Prentice Hall. ISBN-13: 978-0-321-62911-1

COURSE DESCRIPTION:

This course provides an introductory framework for the statistical background required for scientific computation and data analysis. The course introduces fundamental statistical concepts such as probability, random variables, probability distributions, statistical expectation, sampling distributions, hypothesis testing, linear regression, correlation, and visualization/plotting of data, with emphasis on applications to scientific computing and computational science problems. Concepts will be reinforced by having students use a statistical/scientific computing & visualization software in order to apply the concepts that they learn by solving problems from various disciplines. **Credit hours: 3.**

You have to obtain at least a B grade in order to pass this course since this is a prerequisite course for the MS CPSI program.

STUDENT LEARNING OUTCOMES:

Students will be able to

- (SLO #1) demonstrate understanding of the probability, random variables and probability distributions
- (SLO #2) demonstrate understanding of hypothesis testing and inference
- (SLO #3) demonstrate understanding of linear regression and correlation
- (SLO #4) demonstrate understanding of using statistical descriptors of data for analysis and visualization
- (SLO #5) demonstrate the ability to use a statistical analysis toolbox/software and apply to real data for statistical analysis and visualization

COURSE CONTENT TIMELINE*

Week 1: 01/19, 01/21	Chapter 1. Introduction to Statistics and Data Analysis
Week 2: 01/26, 01/28	Chapter 2. Probability
Week 3: 02/02, 02/04	Chapter 2. <i>continued</i>
Week 4: 02/09, 02/11	Chapter 3. Random Variables and Probability Distributions
Week 5: 02/16, 02/18	Chapter 4. Mathematical Expectation
Week 6: 02/23, 02/25	Chapter 5. Some Discrete Probability Distributions
Week 7: 03/01, 03/03	Chapter 6. Some Continuous Probability Distributions
Week 8: 03/08 03/10 Thursday 03/14 - 03/18	Chapter 6. <i>continued</i> . Midterm Exam, in class. Covers all the material covered so far. <i>Spring Break Week, No Class.</i>
Week 9: 03/22, 03/24	Chapter 8. Fundamental Sampling Distributions and Data Descriptions
Week 10: 03/29, 03/31	Chapter 8. <i>continued</i> . Chapter 9 beginnings.
Week 11: 04/05, 04/07	Chapter 9. One- and Two-Sample Estimation Problems
Week 12: 04/12, 04/14	Chapter 10. One- and Two-Sample Tests of Hypotheses
Week 13: 04/19, 04/21	Chapter 10. <i>continued</i> . Chapter 11 beginnings.
Week 14: 04/26, 04/28	Chapter 11. Simple Linear Regression and Correlation
Week 15: 05/03, 05/05	Last week of classes. The last week will be used for covering the course materials for missing days, covering any unfinished course materials from the days before, Q&A/review session if time permits; possible new course material if necessary and possible participation in other course students' project presentations.
Finals week: 05/10, Tuesday	Final Exam between 10:30am-12:30pm, in class, comprehensive of all material covered, as per the final exam schedule at: http://www.tamuc.edu/admissions/registrar/academicCalendars/final-exam-schedule.aspx

*Tentative. All dates and content may be subject to change throughout the semester; changes will be communicated to the students in class or via eCollege course shell announcements or via email.

EXAMS & GRADING*:

Attendance, Participation & In-Class Pop-Quizzes	20%
Homework Assignments & Projects	30%
Midterm Exam	20%
Final Exam (<u>Comprehensive of all the material covered</u>)	30%

*Tentative.

COURSE REQUIREMENTS:

“Blended/Hybrid” (“B”) course via eCollege: The course is a “blended/hybrid” (“B”) course, hence the section name 01B. The course must meet in person face to face on-campus (or at the instructional site) at least 50% of the time during the semester. Actually, we will be meeting almost 100% of the time (that is my goal), but I may cancel a couple of classes due to conference travel etc. and in that case I will announce and upload the missed lectures to the eCollege course shell. The course is supplemented with an eCollege course shell for convenience to the students: Login via <https://secure.ecollege.com/tamuc> or <http://online.tamuc.org>. Assignments will be uploaded to eCollege course shell. Students are responsible for obtaining and setting up their eCollege account using their TAMUC student login. **Students need to follow the eCollege course shell daily** for the course announcements, downloading and uploading the assignments, and other course activities. *If at any time you experience technical problems (e.g., you can't log in to the course, you can't see certain material, etc.) please contact the eCollege HelpDesk, available 24 hours a day, seven days a week. The HelpDesk can be reached by sending an email to helpdesk@online.tamuc.org or by calling 1-866-656-5511*

Study: You should allocate a minimum of three hours of outside preparation for each hour of class for successfully completing the course; that is, 7.5 hours per week.

Assignments: There will be regularly assigned homework problems. These assignments may require the application of various software packages. Assignments will be given and returned via the online eCollege system as a convenience to the students and the instructor. It is the student's responsibility to login and check the course eCollege site daily for announcements, assignments and course-related content. ***It is very important that students follow the instructions carefully on the assignments.*** It is the student's responsibility to have all assignments ready on time by the given due date. Late assignment may *not* be accepted or may be *penalized* and assignment may not be accepted beyond a certain time. Important material from the text and outside sources will be covered in class. Students should plan to take careful notes as not all material can be found in the texts or readings. End of chapter activities and online activities may be assigned to reinforce material in the text.

Exams: Two exams will be given, one midterm exam and one final exam. The exams will be closed book/notes and will test assigned readings and material discussed in class. The instructor may add other necessary exams if he sees necessary. Cellphones and other telecommunication electronics will not be allowed during the exams.

Attendance: Student participation will be graded by the level of class participation and attendance. Students are expected to attend every class. The student may automatically fail the course as per the university procedures if the attendance is below certain percentage.

Quizzes: *Unannounced* pop-quizzes will be given to help ensure students stay up with assigned material. These quizzes may cover any course material that has been so far covered, with an emphasis on recent material that is covered.

Projects: In some of the assignments, there will be applied statistical analysis projects in which the concepts will be reinforced by having students learn to use a statistical /scientific computing & visualization software and apply it to analyze data from various disciplines.

*Students can see their graded assignment, quiz, exam papers, project reports and ask their questions during the office hours. The students have maximum **one week** to see their graded papers after the grades are announced (announced in class or uploaded to eCollege); beyond that, at the instructor's discretion. The overall course grades are finalized after all the exams, assignments, quizzes and attendances are weighed & evaluated at the end of the semester on the instructor's excel spreadsheet.*

ACADEMIC ETHICS, POLICY AGAINST CHEATING:

"All students enrolled at the University shall follow the tenets of common decency and acceptable behavior conducive to a positive learning environment." (See Student's Guide Handbook, Policies and Procedures, Conduct). Ethics include the issue of plagiarism, and copying parts or whole of assignments, quizzes and exams is just as serious as any other type of plagiarism. If you are caught sharing or using other people's work, you will receive a 0 grade and a warning on the first instance. A subsequent instance will result in receiving an F grade for the course, and possible disciplinary proceedings. The student who shares his/her work, as well as the one who copies, will **both** receive a

0. Copying/pasting from each other, from any solutions manuals, instructor's solutions, or any other person's solutions (e.g. previous students etc.) are ALL also considered cheating.

ATTENDANCE POLICY:

Student participation will be graded by the level of class participation and attendance. Students are expected to attend every class, on time. The student may automatically fail the course if the attendance is below a certain percentage, as per the university policies. If a student is absent from class on the due date of any assignment, they are expected to make alternative arrangements in advance to assure that the assignment is turned in on time. If you are late, your attendance that day may be penalized. Any student wishing to withdraw from the course must do so officially as outlined in the class schedule. **THE INSTRUCTOR CANNOT DROP OR WITHDRAW ANY STUDENT.**

If you will be absent from class for any reason, it helps if you email me about your absence in advance. You can **only** be excused of absence if *i*) your absence is due to a university-approved reason (e.g. sickness,...) **and** *ii*) if you can provide supporting document as an evidence (e.g. doctor's report,...) within a reasonable amount of time.

COURSE REQUIREMENT DEADLINES:

Credit will be given for ONLY those exam(s), program(s), and/or project(s) turned in no later than the deadline(s) as announced by the instructor of this class unless prior arrangement has been made with the instructor. Late assignments will be penalized, and the instructor may not accept late assignments after a specified period.

METHOD OF EVALUATION (Tentative):

Final average Letter grade

90.00 – 100	A
80 – 89.99	B
70 – 79.99	C
60 – 69.99	D
Below 60	F

STUDENTS WITH DISABILITIES REQUIRING ASSISTANCE:

The Americans with Disabilities Act (ADA) is a federal anti-discrimination statute that provides comprehensive civil rights protection for persons with disabilities. Among other things, this legislation requires that all students with disabilities be guaranteed a learning environment that provides for reasonable accommodation of their disabilities. If you have a disability requiring an accommodation, please contact:

Office of Student Disability Resources and Services

Texas A&M University-Commerce

Gee Library, Room 132

Phone (903) 886-5150 or (903) 886-5835

Fax (903) 468-8148

StudentDisabilityServices@tamuc.edu

SMOKE, VAPOR & TOBACCO FREE ENVIRONMENT:

University Procedure 34.05.99.R1 now prohibits the use of vapor/electronic cigarettes, smokeless tobacco, snuff and chewing tobacco inside and adjacent to any building owned, leased, or operated by A&M – Commerce.

UNIVERSITY RULES AND PROCEDURES can be accessed at

<http://www.tamuc.edu/aboutUs/policiesProceduresStandardsStatements/rulesProcedures/>

This syllabus is tentative. The instructor maintains the right to modify the course syllabus & policies within the semester if need arises. Applicable changes will be communicated to the students in class or via eCollege course shell announcements or via email or in class.
