Course Description

This course is designed to provide you with information about the application of psychological theories to learning processes, and provide information about the development of children and adolescents. Principles and procedures of measurement and evaluation are also included. The primary objective is to facilitate a clear understanding of the complex and dynamic processes of learning and development within the context of educational psychology.

The syllabus/schedule are subject to change.

Student Learning Outcomes

The student is expected to be able to 1) distinguish age-appropriate behaviors as they relate to learning and teaching; 2) apply information regarding the theories of the teaching-learning processes to how people learn, what factors motivate them, and how they retain knowledge; and, 3) distinguish between measurement and evaluation and the implication of each for assessing student progress. The four major areas that will be covered in this course are: 1) development; 2) learning and motivation; 3) measurement and evaluation; and, 4) professionalization issues, including critical thinking.

TECHNOLOGY REQUIREMENTS

Browser support

D2L is committed to performing key application testing when new browser versions are released. New and updated functionality is also tested against the latest version of supported browsers. However, due to the frequency of some browser releases, D2L cannot guarantee that each browser version will perform as expected. If you encounter any issues with any of the browser versions listed in the tables below, contact D2L Support, who will determine the best course of action for resolution. Reported issues are prioritized by supported browsers and then maintenance browsers.

Supported browsers are the latest or most recent browser versions that are tested against new versions of D2L products. Customers can report problems and receive support for issues. For an optimal experience, D2L recommends using supported browsers with D2L products.

Maintenance browsers are older browser versions that are not tested extensively against new versions of D2L products. Customers can still report problems and receive support for critical issues; however, D2L does not guarantee all issues will be addressed. A maintenance browser becomes officially unsupported after one year.
