

Disabling ActiveX in Internet Explorer

1. Go to settings option available on top-right corner of the Internet Explorer

2. Click on "Manage Add-ons" option available in the menu list

A screenshot of the 'Manage Add-ons' window in Internet Explorer. The left sidebar shows 'Toolbars and Extensions' selected. The main area displays a table of add-ons:

Add-on Types	Name	Publisher	Status	Load time	Navigation
Microsoft Corporation	Windows Live ID Sign-in Helper	Microsoft Corporation	Disabled	(0.02 s)	(0.00 s)
Microsoft Corporation	Office Document Cache Handler	Microsoft Corporation	Disabled	(0.21 s)	(0.00 s)
Not Available					
TechSmith Corporation	Send to OneNote	Not Available	Enabled		
TechSmith Corporation	OneNote Linked Notes	Not Available	Enabled		
TechSmith Corporation	Snagit Toolbar Loader	TechSmith Corporation	Disabled	(0.17 s)	

Below the table, details for the 'Send to OneNote' extension are shown: Version: Not Available, File date: Not Available, Type: Browser Extension, and a link to search for it via default search provider. Buttons for 'Disable' and 'Close' are at the bottom right. A note at the bottom encourages finding more toolbars and extensions.

3. Select **ActiveX**. Now click on the disable button available on the same window.
