Course Type Definitions

	Online Course (W)	Blended/Hybrid Course (B)	Web-Enhanced or F2F Course (E, 001)
% Planned Instruction Mediated by Technology *	100%		0%
Course Format Description	Entire course is mediated by technology. Learners have no expectation of F2F instruction. Instructor ensures that all course materials are provided online.	Course includes both face-to-face (F2F) class time **and** online instruction/content time. The number of face-to-face meeting times is reduced. Online instruction/content time may be synchronous or asynchronous. Learners have expectation of meeting some class times face to face and completing some course instruction online.	100% of course components are delivered in a classroom on the scheduled days and times. Online delivery may not substitute for any F2F class meetings once scheduled for the enhanced course (i.e. ITV, inverted class model). Learners have F2F interaction with their instructor on a regular basis throughout the course/term. Technology is supplementary.

*Based on Texas Administrative Code
